Subject: Dashboard Material Options - Supplier Quote Feedback

Hi Marcus, Laura,

We've received two quotes for RPT-INT-001 - Dashboard panel:

- NorthFab Polymers Inc.: \$44.50 CAD, recycled polymer content at 27%
- VerdaMold Solutions: \$46.25 CAD, polymer with embedded hemp fibers (35% bio-based)

Both meet dimensional requirements, but NorthFab is within target cost ( $\leq$  \$45 CAD per RFQ-RPT-005).

VerdaMold's material exceeds our sustainability target, but the cost is higher.

Thoughts?

- Alicia

Let's tentatively go with NorthFab. They're on the AVL, and 27% recycled content is close enough to the 30% goal.

## **Internal Email Threads - Project Raptor**

We can negotiate for higher content later if necessary.

- Marcus
